Expert Coding = Compliance

The Expertise You Need

Radiation Business Solutions offers coding services for hospitals and freestanding centers that provide radiation therapy but do not have the staffing or expertise in coding this complicated specialty. RBS provides you a combination of certified coders, audit processes, and expertise to code your radiation oncology procedures. We'll ensure that each procedure is coded correctly, and that your documentation meets coding requirements.

Deliverables

- ▶ Complete review of internal oncology system setup to ensure accuracy and adherence to clinical workflow.
- ▶ Dedicated coders available to physicians and staff for questions.
- ▶ Acts as a gatekeeper by identifying incomplete documentation and documentation errors to allow for proactive correction.
- ▶ Comparison between the schedule and submitted charges.
- ▶ Every line item is checked against documentation to ensure accurate reporting of services rendered.
- ▶ Discrepancies are reported back to allow for correction prior to claim submission.
- ▶ Application of modifiers when appropriate.
- ▶ Direction on opportunities for documentation improvements to coincide with the latest payer guidelines.
- ▶ Assistance with payer authorizations, denials, and reimbursement issues.
- ▶ As experts in the field, we inform you of annual coding updates, system upgrades, new treatment techniques and best practice.

Charge entry services are also available, and our coding services can be combined with our in-house billing services.

Beyond Billing Services: Reducing Physician and Patient Financial Anxiety

At Radiation Business Solutions, we relieve financial anxiety for physicians so that they can focus on healing patients. RBS specializes in radiation oncology billing, radiation oncology coding, management solutions, new cancer center development, and the patient experience. Each year, we relieve financial anxiety for over 2,700 patients a day and over 200 physicians so that they can focus on health.

"Radiation Business Solutions has been wonderful to work with. Their assistance in setting up our global billing and tracking physician productivity have been critical to our success. Leah makes herself readily available and is very easy to talk to. A thorough audit later showed less than 1% error rate. Radiation Business Solutions has truly been a valuable partner."

— Erinaldo Elemento Jr.
Vice President of Professional Services
Hamilton Medical Center
