

Billing & Revenue Cycle Management

Reduce financial toxicity for cancer patients

We are Patient Advocates first and foremost. Our team is dedicated to giving patients compassionate, caring guidance through the financial process – and holding payers accountable for paying their fair share of treatment costs. Patient experience is the future of healthcare reimbursement. You know that your patients are receiving the best clinical care possible, but what about the non-clinical aspects of care? A poor experience with your billing department can have a detrimental effect on your patient satisfaction scores... and your revenue.

Our complete Revenue Cycle Management Service includes:

- ▶ Commercial payor negotiation
- ▶ Claims submission
- ▶ Authorizations
- ▶ Financial counseling
- ▶ Accounts receivable

We're not just another transactional billing company

RBS is not another transactional billing company to outsource your claims submission. Our focus is on your entire revenue cycle because one facet affects the other. We will gladly share a complete list of revenue cycle management services upon request.

Reduce the amount of your time spent on administration and management issues.

Our team acts as an extension of your office – seamlessly integrating your practice style and philosophy into our proven processes. We operate like an in-house financial team without the administrative hassle. Most importantly, we treat your patients the way we would want to be treated. Use office visits for patient clinical care – not billing issues.

"Of all of the business decisions my partners and I have made over the years, the decision to work with RBS has been the best! The team goes above and beyond for us and our patients. They do excellent work."

– Dr. Dan Ferraro

"I appreciate your help in speaking with my insurance company for me and seeing how to get my radiation therapy approved even though my policy does not cover radiation therapy. Thank you for keeping me up to date on your progress with it."

– Patient of Dr. Simon Brown
