

THE SOLUTIONS YOU'VE BEEN SEEKING

Billing

Get paid appropriately and accurately for your services. Our patient advocates are experts in maximizing your revenue and minimizing your stress, while reducing your patients' financial anxiety.

Provider Enrollment

Our dedicated credentialing coordinators with extensive provider enrollment experience credential physicians with Medicare, Medicaid, commercial payers and managed care plans.

Revenue Cycle Audit

Oncology experienced auditors review a sample of patient charts to identify missing documentation or coding problems that could lead to compliance issues and fines.

Education & Training

Our oncology billing experts lead training and education on all aspects of revenue cycle management (billing, coding, authorizations, denials, etc.) on-site or remotely, at a time that best suits you.

Proton Authorization & Denial Management

The Apollo team of dosimetrists knows how to get your proton treatments approved. Available for all of your cases or just your toughest. We take the risk - only pay us if your cases get approved.

Radiation Oncologist Recruitment

You have the benefit of our vast industry network to help you obtain a new physician for growth and/or succession planning. We can locate a radiation oncologist tailored to your specific market.

Authorizations

An efficient claims process starts with an appropriate authorization. We work seamlessly within your system, ensuring prior authorizations are correct and in place before treatment begins.

Coding

Our oncology-specific, U.S. based certified coders act as gatekeepers, checking every line item against documentation to ensure accurate charges go out the door.

Operational Assessment

We give you actionable items to improve your overall efficiency by reviewing your clinical process workflows, staffing benchmarks, and productivity measures.

RBS Edge

As the *only* radiation oncology specific marketing service, we offer a range of services - from auditing your existing materials, to social media management, to a full marketing program to fit your specific needs.

ENCORE IT

Our radiation oncology-specific IT solution is perfect for small cancer centers. Let us handle all your IT hassles for a flat monthly fee - equipment and 24/7 support included.

Project Development | Feasibility Studies

We have built our own centers from the ground up - now allow us to use our expertise to open a new center, expand your existing center, upgrade your equipment, or add additional lines of services such as diagnostic imaging.
