

Prior Authorizations

Stop dealing with insurance denials and lost revenue

Why prior authorization?

Radiation Business Solutions recognizes that proper prior authorizations are integral to your practice's overall financial success. Improper or missing authorizations lead to unnecessary denials and loss of revenue. Let us help you streamline this process to prevent unnecessary claim denials and delayed reimbursement!

What do we do?

Utilizing the RBS Authorization team reduces financial stress to your patients by obtaining proper authorizations before the patient's scheduled visits. We work as an extension of your in-office staff, obtaining all necessary prior authorization information and entering it directly into your system while providing specialized training to educate your team on the most effective processes for prior auth approvals. We'll also communicate with you on cases that will not auto-approve or that do not meet payor guidelines prior to submission, allowing you to provide the necessary information or amend the case to avoid delays.

What makes us unique?

Our experienced team members are radiation and medical oncology authorization subject matter experts who truly understand payor auth requirements. We cross-train our team so there is always complete coverage - never any downtime due to vacations or illness. We focus on building relationships with you and your staff, so that we can act as an extension of your team.

Want to learn more?

Let us show you how proper prior authorizations can prevent claim denials and delayed reimbursement.

RBS Authorization Services can be provided as a standalone service or can be combined with our coding and/or billing services.

What our clients say:

“From understanding our needs on a case-by-case basis to providing excellent education to our provider on clear documentation for straightforward insurance approvals the first time, the RBS authorization team is the gold standard to support the prior authorization process of any center.”

– Joan S.

Director of Clinical Operations
Eastern Oregon Cancer Center
