

# Consulting & Auditing Services

Radiation Business Solutions offers an array of services to enhance your oncology program. Our oncology experts have decades of experience in all types of settings: academic hospitals, community cancer centers, private practice, and critical access hospitals, as well as freestanding centers.

## Revenue Cycle Audits

An effective revenue cycle program reduces the number of unnecessary denials, ensures that patients are paying the correct amount out of pocket, and, ultimately, reduces patient financial anxiety. We'd love to help you ensure that your patients are getting the very best care for their financial journey as your team puts forth for their clinical care!

RBS will review the processes that occur within the revenue cycle as well as audit the medical records for compliance and accuracy.

## Marketing Strategy & Services

With all the advertising and marketing options available today, it's easy to throw money away on ads that do not target the right consumers. We recognize that many of your patients are referrals from other physicians, which means that traditional patient marketing tactics might not be right for your practice.

Let our team of radiation oncology marketing experts develop a strategic marketing plan for you, helping you to reach the patients who need your services.

## Operational Assessments

Does your team feel like they need more help? Have you hired more staff, but the work is still not getting completed? Are your staff practicing at the top of their licensure? Is it impossible to get approval for a new FTE? We will review aspects of your practice such as staffing benchmarks and productivity, capacity analysis, process flow and space analysis and more.

### We also offer:

- ▶ Education & Training
- ▶ Physician Employment Contract Review and Negotiations
- ▶ Equipment Procurement
- ▶ Finance & Accounting Services
- ▶ Leadership Development
- ▶ Physician Succession Planning
- ▶ And more!

## Beyond Billing Services: Reducing Physician and Patient Financial Anxiety

At Radiation Business Solutions, we relieve financial anxiety for physicians so that they can focus on healing patients. RBS specializes in radiation oncology billing, radiation oncology coding, management solutions, new cancer center development, and the patient experience. Each year, we relieve financial anxiety for over 2,700 patients a day and over 200 physicians so that they can focus on health.
