

# ENCORE IT

## Cost-effective, oncology-specific IT Solutions

### Does your IT company really understand radiation oncology?

RBS does. We know how important it is to you and your patients to keep your systems up and running. That's why we offer ENCORE IT. For less than the cost of an in-house IT person, we can provide all of the services you need to ensure that your cancer center's systems are running smoothly – and we guarantee 99% uptime for your cancer center. Our flat fee complete IT management of your clinic includes:

#### Data Backup and Disaster Recovery

Don't risk losing your valuable data. ENCORE IT ensures that your data is backed up regularly and can be quickly restored during data loss. Our Disaster Recovery service provides your cancer center with a plan for recovering from major events like natural disasters, cyber-attacks, or hardware failures.

#### Cyber Security and HIPAA Compliance

Your cancer center takes every precaution to ensure sensitive patient information remains protected. Our experts in cybersecurity and HIPAA compliance take that protection one step further – ensuring all data is secure and meets necessary regulatory requirements.

#### Hardware

Electronic medical record (EMR) systems must meet technical specifications to ensure they run efficiently and accurately. ENCORE IT can provide your cancer center with hardware optimized for EMR software, including servers, workstations, and storage solutions that meet all industry security, reliability, and compatibility standards.

### Want to learn more?

Contact us today for more information. Let us show you how we can provide your cancer center with an IT solution that meets your specific needs.

### What our clients say:

“ENCORE IT makes us feel like we really matter and are special, even though you have other folks you support as well. We always feel like we are your favorite. The ENCORE IT team goes above and beyond.”

– Joan S.  
Director of Clinical Operations  
Eastern Oregon Cancer Center
